The Russian Federation

Statements of Commitment to the Global Alliance Against Hunger and Poverty

General section

1. The Russian Federation hereby voluntarily *joins the Global Alliance Against Hunger and Poverty* and states its dedication to pursue the Alliance's mission, objectives and principles, as *expressed* in the Global Alliance's Terms of Reference and Governance Framework, and to collaborate with other members to achieve lasting solutions to poverty and hunger worldwide, as expressed below.

   The Russian Federation:

2. *Recognizes* that hunger and malnutrition are the perverse manifestations of persistent, structural poverty and inequality, and recognizes the need to end poverty and hunger in all their forms and dimensions and to fully and effectively implement the 2030 Agenda.

3. *Acknowledges* the alarming growth in the number of people facing food insecurity and poverty in recent years, noting that, despite all significant past and current efforts, the world is not on track to meet SDG 1 and 2 targets, inequality is also on the rise (SDG 10), and a significant increase in collective ambition, as well as improvement in collective alignment and coordination for the fight against hunger and poverty, is urgently needed.

4. To that effect, *endorses* the Global Alliance Against Hunger and Poverty and its mission to *support and accelerate efforts to eradicate hunger and poverty (SDGs 1 and 2) while reducing inequalities (SDG 10), contributing to revitalize global partnerships for sustainable development (SDG 17) and to the achievement of other interlinked SDGs, and championing sustainable, inclusive and just transitions*.

5. *Notes* that it is crucial for the world to unite behind large-scale, integrated approaches combining international, regional, national, and local levels, that recognize the interconnected nature of challenges and solutions to hunger and poverty and pair social protection with access to goods and services that can help the poor and vulnerable populations to overcome structural barriers and drive responsible investment in their productive capacity. These complementary services include but are not limited to interventions for poverty reduction, food security and nutrition, early childhood support, education and skills development, employment services, health and care services, as well as family farmers and smallholders' access to finance, extension services, research and/or agricultural inputs, in line with international commitments and obligations.

6. *Particularly recognizes* the high value and positive impact of quality implementation of national and local country-owned, inclusive policy instruments and programmes, focused on the poorest and most vulnerable, in the fields of poverty reduction, social protection, food security and nutrition, gender equality, decent work in the agri-food sector,

skills development, family farming and smallholder agriculture, food systems transformation, health and care services and resilience building.

7. Also *acknowledges* the Global Alliance's reference basket of such policies as a collectively built, ongoing collection of examples with robust evidence to reduce hunger and poverty, and as a useful basis to guide joint action and increase alignment of the international community at country level. This acknowledgement is applicable to the policy basket approach as a general guide to action and does not imply endorsement of any specific policy instrument or programme contained in the basket.

8. Therefore, by joining the Global Alliance Against Hunger and Poverty, *commits* to do its best efforts, in its own field of action, and according to its own mandate, capacities, priorities, preferences, procedures, and legal arrangements and framework, to support the implementation of policy instruments and programmes at country level as appropriate, including by the promotion of shared learning and the mobilization of resources, public and private, at scale.

In particular:

Domestic policy implementation commitments

The Russian Federation acknowledges its role in the national-level implementation of policies and programmes against hunger and poverty, as well as for providing guidance and support to sub-national level policies and programmes.

The Russian Federation:

Commits to make its best efforts to implement, improve, and/or scale-up the implementation of policy instruments and programmes from among those contained in the Global Alliance's policy basket in our national context. These policy instruments and programme suggestions would be adapted to the specific conditions, realities and opportunities presented in our country.

In particular, The Russian Federation commits to implement, improve, or scale-up the implementation of the following policy instruments or programmes, referenced in the Global Alliance's reference basket:

1) **Russian Public Policy for Smallholder Farmers Support**. State support of small-scale farming (grants, subsidies and costs reimbursements) is aimed to stimulate the creation of small agribusinesses, especially in rural areas. Agribusiness is not only local economy incentive, but also contributes to additional jobs in rural areas and involvement of various categories of population (young people, older people) in the production process.

2) **Social contract** is provided on a declarative basis to citizens whose average per capita income is lower than the subsistence minimum. Using this Instrument, you can get support for the development of business activities, maintaining a personal subsidiary farm, finding a job, training, and other areas related to overcoming a difficult life situation.

3) Ensuring the sustainability of the **National School Feeding Program**. The proposed instrument is based on increasing the economic potential of schools and the local community (business). The instrument consists of three pillars:

- development of the production potential of schools for growing agricultural products, and the use of solar energy;
- integration of local business' (communities) contributions into the school feeding programme;
- integration of economic mechanism for the functioning of the school feeding programme.

Commits to observe good practices throughout the implementation of such policy instruments and programmes, including maintaining effective governance, seeking avenues for domestic resource mobilization for funding such programs and providing for appropriate monitoring and evaluation, with adaptation and learning based on social involvement and consultation, local stakeholder engagement, minimizing negative impacts and seeking to adequately manage policy trade-offs.

Policy cooperation and support commitments

Commits to, within its capacities, share its own learnings and otherwise provide appropriate help and support, within its means, to other Global Alliance member countries to implement, improve, or scale-up the implementation of policies and programmes referenced in the Alliance's basket.

Specifically, informs and commits to implementing the following actions, programmes, and other activities related to lessons-learned and international cooperation in support of the Global Alliance´s objectives:

1. **Russian Public Policy for Smallholder Farmers Support**;
2. **Social contract**;
3. **National School Feeding Program**.

Knowledge support commitments

The Russian Federation:

Commits to make its best efforts to co-create and provide technical assistance, capacity building and strengthening, training and/or knowledge-sharing on voluntary and mutually agreed terms in response to requests by Global Alliance member countries that choose to implement policy instruments and programmes in the Alliance's policy basket that are compatible with its areas of expertise.

Commits to make its best efforts to improve the alignment of its actions, including through the Global Alliance's coordination mechanisms, leveraging, and partnering with other actors to better support large scale, country-owned implementation of policies and programmes in the reference basket by Global Alliance member countries, aiming at enhancing country-level outcomes.

Commits to collaborate with other Alliance members to develop innovative solutions and share good practices in learning and knowledge exchange and dissemination on voluntary and mutually agreed terms, data collection and analysis, including by leveraging existing local, national, and international knowledge networks, coalitions, communities and other fora related to aspects relevant to the fight against hunger and poverty.

Informs its capacity and readiness to support Alliance member governments in implementing, improving or scaling-up the following policy instrument types, referenced in the Global Alliance's basket of policy instruments:

Eurasian project on monitoring system of agroclimatic resources and crop productivity. The Eurasian Center for Food Security under Moscow State Lomonosov University conducts analysis of the major trends in crop yields due to climate change over the past decades in the main grain-producing regions of Russia and neighboring countries.

Eurasian project on the creation of agro-natural-soil information systems based on the use of cartographic national/regional databases and geographic information technologies as a basis for monitoring soil conditions and providing sustainable management of soil resources.

Eurasian project on the creation and maintenance of consulting and educational centers for agriculture, with the aim of conducting environmental and demonstration tests of new plant species and varieties in the region.

General acknowledgments

Recognizes the possibility to, including through the mechanisms available to Global Alliance members, coordinate, partner with and/or seek support from the Global Alliance's other members, within their respective capacities, availability, and fields of activity, to carry out the present commitments with greater effectiveness.

While recognizing that the above commitments are voluntary and non-legally binding, being subject to and carried out under its own capacities, regulations, priorities, and modalities, as well as to the availability of appropriate resourcing, *strives* to seriously consider, as appropriate, and according to its own legal frameworks and governance process, to review its procedures and priorities as found necessary to better deliver on the present commitments, enhance synergies and joint efforts with other entities and initiatives, and improve outcomes on the collective fight against hunger and poverty.
