

GLOBAL ALLIANCE AGAINST HUNGER AND POVERTY

Ending hunger and poverty. Together.

The world's broadest coalition focused exclusively on turning proven solutions to hunger and poverty into country-led action at scale.

About us

Launched at the G20 Summit in Brazil on 18 November 2024, the Global Alliance against Hunger and Poverty brings together countries, development partners and knowledge institutions to align political ambition, financing, technical support and knowledge to fight hunger and poverty through large-scale, evidence-based programmes and policies.

“ There is no shortage of good ideas. What we lack is implementation and political will. The Global Alliance against Hunger and Poverty makes it possible to share experiences and support the implementation of effective public policies to reduce inequalities.”

President Luiz Inácio Lula da Silva, Brazil

Mission

Support and accelerate efforts to eradicate hunger and poverty (SDGs 1 and 2) while reducing inequalities (SDG 10) and contributing to revitalizing global partnerships for sustainable development (SDG 17) and to the achievement of other interlinked SDGs, and championing sustainable, inclusive, and just transition pathways.

Constituent pillars

National pillar: Implement proven solutions and support countries in need.

Knowledge pillar: Mobilize technical capacity and evidence to support effective policy implementation.

Financial support pillar: Align donors and funds to support country-led programmes.

Objectives

1

Provide sustained political drive at the highest level and build upon synergies with other efforts to eliminate hunger and poverty.

2

Facilitate mobilization and improved alignment of domestic and international support, to enable large-scale country-owned and country-led implementation of evidence-based programmes and policy instruments.

Our membership

 **222** members

 **107** countries

 **70** foundations and others

 **31** international organizations

 **14** international financial institutions

How we work

Through tailored processes, the Global Alliance reduces transaction costs and duplication, creates economies of scale and scope, and facilitates collaboration.

Governance structure

Co-chairs: Brazil and Spain

Summit against Hunger and Poverty:

High-level convening reviews global progress and renews political momentum.

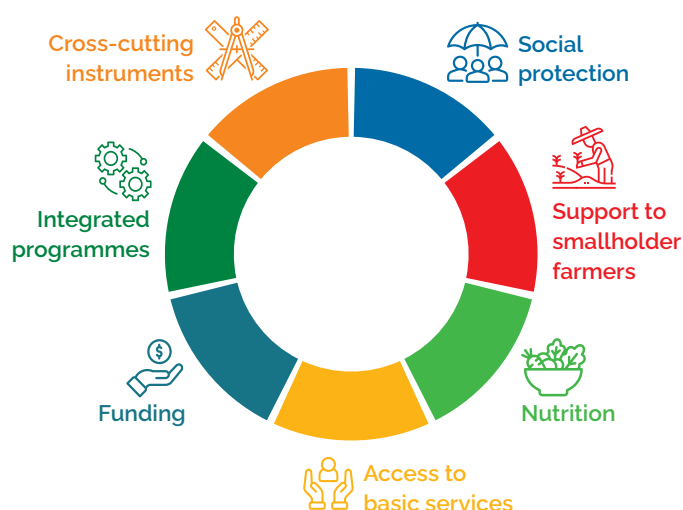

Board of Champions: Senior representatives from the three pillars mobilize member participation and follow-through.

Core Group: Eight countries provide strategic oversight to the Support Mechanism, including two co-Chairs and six Vice Chairs of the Board.

Support Mechanism: A small multi-agency team facilitates coordination processes, with presence in Addis Ababa, Bangkok, Brasilia, Rome and Washington, DC.

Policy Basket

The Policy Basket provides a menu of rigorously evaluated policy instruments and country examples, building on the broad experience and expertise of the Alliance membership, that governments can adapt to their national or subnational contexts.

Country programme support

A demand-driven process that helps governments shape national programmes and mobilizes tailored support for them.

Country request and assessment:

Governments submit a support request and define needs and scope with the Support Mechanism.

Programme planning:

Governments develop pre-plans for national programmes with development and knowledge partners.

Matchmaking:

Members submit Expressions of Interest offering financial, technical and knowledge support in response to specific Government requests.

Implementation planning:

Members and the implementing Government agree on roles and responsibilities, and approve an implementation roadmap.

Formalization, implementation and learning:

Agreements are formalized, implementation begins and lessons feed back into the Policy Basket.

Financing pillar

The country process clarifies the national ambition, needs for financial partnerships and a pathway for increasing domestic financing. The Global Alliance facilitates the connection between implementing countries and financing. At the same time, the Global Alliance provides a platform for financing partners to better integrate financing to increase the efficiency and effectiveness of external development assistance. The initiative seeks to converge finance from different sources towards country-led programmes.
